**STATEMENT REGARDING UNINTENTIONAL ABANDONMENT OF PATENT**  
**UNDER 37 C.F.R. 1.137(b)**

Sir:

In compliance with 37 C.F.R. 1.137(b) Applicant submits the following statement:

The entire delay in responding to the Office Action of April 18, 2005 was unintentional. The Applicant submitted a non-compliant amendment prior to the six-month statutory deadline for responding to an Office Action. A notice of the noncompliant amendment was received and responded to by the Applicant, but not before the expiration of the six-month deadline. As a result, the application went abandoned. The Applicant did not intend the application to go abandoned and believed a response to the notice of noncompliant amendment could be submitted after the 6 month deadline if the original amendment was timely filed.

Respectfully submitted,

Dated: March 28, 2006

**WARNING:**

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.
